It Burns Within

RECORD B G#m Vamp chords during intro

```
      B            G#m     E                                  B
I have lost all good reason to believe that there is someone here for me
     B          G#m              E                          B
Everynite I go out searchin' Till my reflection in the window's all I see
     G#m
That shadow staring back, A little demon child. Burns me with a reason
        E          F#
To stick around for a while
      B                G#m              E                              B
Oh my heart would beat so loudly In the absence of the ones who lay beside me
        B              G#m                E                        B
I always thought I needed someone Just to let me know that everythings alright
     G#m                                      D#m
Oh to think that someone is out there Who wears the key around their neck
                     C#m                G#m
That'll free me from my chains Well there's no sign yet
               C#m                 E            F
I can't quiet the voice calling out From inside of these walls

       B
I just wanna love with you everynite
    G#m                          E                          F#
The moon above is the only light we'll need Cradle of her arms we'll sleep
                 B  D#7              G#m G#7
Wander through each world   Alive within ourselves
       C#m                          F#              B
All the walls will crumble down my dear     My Love is here

        B                G#m        E                                B
From the start I've had no reason Every move she's made has sent me toward the floor
              B                  G#m              E                                B
But still these walls they have consumed me Now she's caught me here with one foot out the door

   G#m                            D#m
As long as I feel the need There will always be this gap
  C#m                                        G#m
Between the Love I seek and the person I'm looking at
             C#m                        E                      Em
So quick to forgive, that beneath the chain's a flame that burns in me
         E        F#
And it's all I need

*Chorus*

B  C#m   Em  F#          G#m    D#m   C#m    C#dim   C#m  F#
Ooh                 Oh oh oh.
E            F#        B
I just wanna love you again
```
