Lead the Way (Loop)

F#m D A

```
   A7            G7           F7                G7
lately i have slowed down, i've been looking around
  A7                    G7           C7          D7
it's gotten clear that i need to find, some solid ground
   G                    G7           C7                A#7
well i don't care too much for money, darling neither do you
      A7                    E7               D7
and after all, there ain't too much we stand to lose

i've played the game the best i could, and i had my fun
but in the end it's never enough, so don't tell no one
but i've packed every inch of the getaway car, for some place new
and i've been saving shotgun for you

  A              D7
sadie, won't you stay with me forever
sadie, won't you stay
sadie, won't you stay with me forever
 F#m D     A
oh won't you stay

through the cold wind and rain, you didn't doubt a thing
standing tall through the darkest night, that road could bring
well the sun might set in the rearview mirror, all orange and red
but in the morning, it's gonna rise over those mountains ahead

  A              D7
sadie, won't you stay with me forever
sadie, won't you stay
and maybe, if we stick it out together
 F#m    D     A
we'll find our way
```

Build A D A E Jam E E7 → F#m D A (OH OH oh) → F#m E D7

```
sadie, lead the way to our heaven
sadie, lead the way
and maybe, in the midst of my endeavor
  F#m       E       D       D7
you're not all that far away…
A                  D7
sadie, won't you stay with me forever
  A            D7
sadie, won't you stay
   A              D7
my lady, you'll remain forever
  F#m   D   A
so won't you stay   (x3)
```
