No California (Loop)

```
           Em
We used to drive to the ocean, lie by the waves
Em
 Bathe in the moment, now I'm alone
           Cmaj7
I pray for rain to come
              Em
Take me away, hmm

Away from the hills full of promise, streets full of pain
Even in winter, bright sunny days
  Cmaj7
I pray for rain to come
Oh, but it never does

          Cmaj7                      D
Gotta get outta here, start a whole new life
         G                   D/F#      Em
Gotta go somewhere where the sun don't shine so bright
            Cmaj7                    D                                  Em
Everything 'round here, everything 'bout this place just brings me down
                                      Cmaj7        D
'Cause there ain't no California without you, without you
                           Em
Yeah, there ain't no California
                                    Cmaj7        D
Yeah, there ain't no California without you, without you
                           Em         D
Yeah, there ain't no California, ooh

It's cold in your shadow, all that remains
Are ghosts in the desert
Should I run away or pray for strength to come?
I'll run away, hmm

[Chorus]

[Bridge]
Cmaj7                    D
I'll keep runnin', baby, I'll keep runnin'
     Em
'Til you stop runnin' through my mind
Cmaj7                  D
I'll keep lovin' you, I'll keep lovin' you
Em
I don't really know why, I know that

[Chorus]  Solo over C D Em

[Chorus]  [Bridge First two lines]
```
